Dan Andrei Tudor

Date of Birth: 07/17/2003

Education

2026/08 – present
PhD Statistics, University of Wisconsin-Madison.
Courses: STAT 701, STAT 709, STAT 849.

2024/09 – 2026/06
MSc Applied Mathematics, Delft University of Technology.
Graduated Cum Laude.
Grade average: 9/10 (4.0/4.0 US GPA).
Specialization: *Stochastics*.

2021/09 – 2024/06
BSc Mathematics, Vrije Universiteit Amsterdam.
Graduated Cum Laude.
Grade average: 9.2/10 (4.0/4.0 US GPA).
Minor: *Applied Mathematics*.

Experience

2026/08 – present
Teaching Assistant. University of Wisconsin-Madison.
Course: STAT 371 (Introductory Applied Statistics for the Life Sciences).

2025/09 – 2026/05
Research Intern. Ortec Finance, Rotterdam.
Worked in the R&D Labs Department, developing a novel model-agnostic uncertainty quantification method for predicting real estate prices in the Netherlands.

2025/09 – 2026/01
Teaching Assistant. Delft University of Technology.
Course: Martingales and Brownian Motion.

2022/09 – 2025/08
Teaching Assistant. Vrije Universiteit Amsterdam.
Courses: Numerical Methods, Linear Algebra, Sets and Combinatorics, Probability Theory, Stochastic Modelling, Mathematical Statistics, Statistical Data Analysis, Basic Concepts in Mathematics, and Mathematical Analysis.

2025/02 – 2025/06
Online Tutor. Apprentus.nl (self-employed).
One-on-one sessions with students at undergraduate level to prepare them for their Calculus and Econometrics exams.

Publications and preprints

1. D.A. Tudor, D. Kurowicka, B. Negyesi, and V. Zoller. "Retrieving predictive densities from conformal predictive distributions". In: *(preprint; under review)* (2026). URL: https://arxiv.org/abs/2609.23350.
2. S. Achimescu, D.A. Tudor, and D. Tudor. "Some Remarks on Rectifying Mate Curves". In: *Romanian Journal of Mathematics and Computer Science* , Volume 13 (Issue 1 2023).

Honours and Awards

2022/11
Holland Society Young Talent Incentive Award. Royal Holland Society of Sciences.
Awarded to the student with the highest first-year undergraduate grade average in Mathematics.

2019/04
Bronze Medal. Romanian Mathematical Olympiad, National Stage, 10th grade.

Research Projects

2025/09 – present — **Master's thesis project.**
Title: *Model-agnostic prediction densities.*
Developed novel approaches to retrieve prediction densities when a conformal predictive distribution is known, while retaining an uniform upper bound on the perturbation of finite-sample marginal validity guarantees. The results resulted in a paper and are under review at the Journal of Machine Learning Research.

2024/01–2025/09 — **Bachelor's thesis project and follow-up research.**
Title: *Stability Analysis of Markov Chains*.
Classified criteria for recurrence of discrete-time Markov Chains. Subsequently, I independently studied Lamperti's problem and developed a new transience criterion for uniformly bounded discrete-time Markov Chains with asymptotically zero mean drift.

2023/06 — **Quantile Regression project.**
Implemented a quantile regression algorithm on a dataset from a school in Portugal to understand the factors that influence students' performance on final exams.

Skills

Languages — Romanian (Native), English (Full Working Proficiency), Dutch (Elementary).

Computer Skills — Python, R, MATLAB. LaTeX

Other Activites

2025/11 — **ATHENS programme.** Istanbul Technical University.
One week intensive course in the mathematics of Bridge.

2025/08 — **IMDb Episodes Sorter.**
Developed a browser web extension that sorts all episodes of a TV series by user rating on IMDb. Available on Chrome Web Store and Microsoft Edge Add-Ons.

2024/12 — **Optiver Live Trading Challenge.** Delft University of Technology.
Participated in a five-session trading course offered by Optiver, which concluded in a live algorithmic trading competition, where my group finished in third place.
